

All the Success
You've Ever
Dreamed of ...
Magically Yours.

As someone who is goal-oriented you already know the importance of having positive and productive thoughts. In fact, it's so important that it's the barrier between mediocrity and extravagant success.

Let's break this down ...

Non-Useful Thoughts ...	Useful Thoughts ...
Are random and chaotic	Are orderly and are not subject to the chaos that is going on around you
Come in response to the outside world—what you see, hear, smell, taste and touch	Tap into the spiritual power that is flowing into your consciousness and use it to originate thoughts and create ideas
Induce boredom, complacency and fear	Attract other thoughts and ideas that vibrate in harmony with your heart's desires
See things as they are and not as they can be	Allow you to actively and deliberately create the life you truly want, instead of settling for the life the world presents to you
Come from your rational mind, and are therefore based on limited and flawed information	Are connected to the perfect, unlimited side of yourself and can literally change the world

So, what's the key to creating thoughts that will produce the success you want?

**Developing your higher mental faculties
– the Magic In Your Mind.**

"You are to become a creator, not a competitor. You will become a creator by employing the higher faculties with which you have been endowed: Perception, Reason, Will, Memory, Imagination and Intuition. No other form of life was given these creative faculties."

WALLACE WATTLES
THE SCIENCE OF GETTING RICH

Bridging the gap between where you are and where you want to be can be easy and even fun ...

Napoleon Hill talked about the importance of developing your higher mental faculties in *Think and Grow Rich*. And Wallace Wattles talked about it in *The Science of Getting Rich*.

Now in a landmark coaching program, the *Magic In Your Mind*, **Bob Proctor**, **Mary Morrissey** and **Sandy Gallagher** actually coach you on how to develop each of your six higher mental faculties—imagination, intuition, will, perception, memory and reason.
